

# BENDING MACHINES ACCURA-BEND

CE Approved

## SUPERIOR ACCURA-BEND SYSTEM

This equipment consists of three different parts; one of which will have to be fitted on the machine control platform and two at the ends of the pipe to be bent. These two end parts are to be secured to the pipe by means of magnet plates. The electronic components are placed inside a housing made with steel and strong plastic material (polyurethane).

The box on the control platform will be equipped with a high-luminosity display (easy to see even on very sunny days), showing 4 digits, two of them being decimals.

All the components are made of extremely durable and high quality material designed to withstand heavy-duty applications, and wide temperature variations of  $-30^{\circ}\text{C}$  to  $+80^{\circ}\text{C}$ .

The level of precision of this device is 1/50 grade. Its battery life is approximately 70 hours before requiring recharging.
